GenAI Verification Log (Mandatory 1.5 Pts)

```
================================================================================
                    COURSE PROJECT GENAI AUDIT LOG (CIS 531 / 731)
================================================================================
Student Name:       Arron Weber (CIS 531)
Assignment:         PS 6: Semantic Search, Chunking, & VDB Schema
Submission Date:    October 2026
Tool(s) Utilized:   Gemini / Claude Code (GenAI Kit Compliant)

1. Prompt & Intent Log:
   - "Formulate chunking cost equations comparing fixed-window vs structure-aware."
   - "Draft JSON Schema Draft 2020-12 enforcing 768-dim vector embeddings and provenance."
   - "Implement deal contracts enforcing EmbeddingCompleteness and NoOrphanEmbeddings."

2. Student Modification & Verification Record:
   - Verified unit-sphere L2 distance equivalence derivations step-by-step.
   - Refactored JSON Schema properties to strictly adhere to Draft 2020-12 specifications.
   - Tested deal contracts in contracts.py with unit tests covering NaN, Inf, and orphan IDs.
   - Reconciled CIS 531 unmodified instructor schema requirements with mixed 531/731 Tier 2
rules.

3. Integrity Attestation:
   All presented equations, contract functions, schema structures, and comparative matrices
   were independently reviewed, verified, and integrated into our Team A Data Engineering
pipeline.
